EMTEX REPORTS A 44% REVENUE GROWTH

BOCA RATON, FL – September 7, 2005 - Emtex Software Inc., the leader in innovative Output Management software solutions for high volume document producers, is pleased to report a record year in financial performance, broad customer adoption by the Fortune 1000® community and global market acceptance.

Celebrating its 13-year anniversary in 2005, Emtex completed its fiscal year, which ended July 31st, with revenues up 44 percent, and a five time increase in profitability; results which are well above current market growth rates. Contributing to this growth was a significant number of new customer wins, particularly in the financial services, insurance, communications and service bureau/outsourcing segments. Existing customers positively impacted this growth, notably with FlexServer and VDE licenses, to strengthen their enterprise output management capabilities.

President and CEO Tim Moylan stated, "This has been a record year in the history of Emtex. We have continued to achieve strong gains in revenue and profitability. We are vigorously gaining market share and, due largely to our focus on innovation, product development and expansion; we are on our way to achieve market leadership as the industry's preferred technology provider. Our customers have embraced the Emtex Enterprise Suite and we thank them for their continued commitment."

In order to keep pace with the evolving needs of its customers, Emtex has achieved a number of significant product advances in the last 2 years. Following the acquisition of FlexServer in October 2003, and Option Software in May 2005, Emtex is now positioned to offer an open, fully integrated and scalable Enterprise level solution capable of meeting the needs of the smallest print shop to managing the largest, multi-site document production facility.

Emtex has continued to strengthen its strategic partnerships with leading players in the market; namely Xerox Corporation and Kodak Versamark. Last May, Emtex announced its latest partnership with Böwe Bell+Howell, which is already producing significant business benefits for both organizations. Emtex will be supporting these three strategic partners at Print '05, McCormick Place Complex, Chicago, IL, 9th – 15th September 2005.

"We are pleased to be working closely with these partners. We share a vision of best in class products, integrated to give customers solutions that work together seamlessly, while also delivering the depth of capabilities that the market demands", said Moylan.

Freedom in Document Workflow

Emtex has significantly grown headcount in research/product development, support and services, to leverage technologies and expand its customer facing presence. Emtex has customers in over 35 countries around the world and offices in the United Kingdom, Germany, France, the US and Canada.

On a final note Moylan commented, "The credit for our performance goes to each of the dedicated individuals and departments that make up the Emtex team. Thanks to their technological achievements, business capabilities and passion for customer service, we have superior products and a rapidly expanding global customer base."

About Emtex

Emtex is the author of the industry-leading output management solutions, VIP and VDE. Founded in 1992, Emtex has offices in the UK, Europe, USA and Canada. Emtex solutions are installed in over 800 production sites worldwide.
